Election/Restrictions

1. Applicant's election with traverse of Species I in the reply filed on January 18, 2006 is acknowledged. The traversal is on the grounds that the examiner has not met the burden required in PCT rules 13.1 and 13.2 and MPEP 1850 to show lack of unity of invention. This is found persuasive because the generic claims have been allowed. Accordingly, the restriction requirement is hereby withdrawn.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art fails to teach, disclose, or suggest, either alone or in combination, a device comprising an emitter, a collector and a base made of doped transparent semiconductor material, wherein the transparent semiconductor material comprises any one of ZnO, $Mg_xZn_{1-x}O$, $Cd_xZn_{1-x}O$, and CdO; wherein the transparent semiconductor material of the emitter, the collector and the base are doped with an n-type impurity selected from one of group III or group VII elements or a p-type impurity selected from group I or group V elements; and wherein the base has a conductivity opposite to that of the emitter and the collector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
